DOCKETED BY

Re: Teleport Communications America, LLC
Docket No. T-20874A-15-0400 [revisions to submitted tariff pages]

On November 25, 2015, Teleport Communications America, LLC's ("TCA") filed its Advice No. AZ-15-0505 which was docketed by the Arizona Corporation Commission ("Commission") as Docket No. T-20874A-15-0400.

After discussions with Commission Staff, TCA is resubmitting various tariff pages from the filing to make minor corrections, including corrections to tariff margin coding.

Enclosed for filing with the Commission are an original and thirteen (13) copies of revisions to TCA's Local Exchange Services tariff pages (ACC No. 3) which were previously submitted in this docket. The affected tariff pages are listed in Attachment A.

Submission of these corrected tariff pages will not change the requested effective date of December 30, 2015.

If you have any questions or concerns, please call me at (775) 333-3991.

Sincerely,

Janice L. Ono w/permission

Janice L. Ono

SECTION 11 - PRIMEXPRESS NETWORK SERVICE^{1,2}

(T)

11.1 GENERAL

PrimeXpress Network Service provides dedicated digital connections from an end user's premises to Business Calling service and to services provided by interexchange carriers that have interconnected to the Company's switch. PrimeXpress Network Service is delivered to the customer's premise at DS1 (1.544 Mbps) rate. A PrimeXpress facility may be provided as stand-alone service or provisioned over an existing or new AT&T ACCU-Ring DS3 facility or Ultravailable Ring (UVN) facility. PrimeXpress Network Service is available in one, two or three-year term commitments.

The Customer may opt to utilize PrimeXpress Network Service for outgoing calls only (DOD), incoming calls only (DID) or a combination of both inbound and outbound calls. When the Customer elects to utilize PrimeXpress Network Service for both inbound and outbound calls, they may choose (1) Combo service which allows both incoming calls (to be terminated to an attendant only) and outgoing calls; or they can elect to utilize (2) DID/DOD service which allows both incoming calls (to be terminated directly to an End User behind a PBX or capable Key System) and outgoing calls. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

PrimeXpress Network Service trunks configured for Inbound and Outbound calling functionality that, upon detection by the Company, exceed 90% utilization for inbound calling will be subject to the rates, terms and conditions for the PrimeConnect Option listed below.

(L)

¹ Effective December 30, 2015, this service is no longer available to new customers or for contract renewals.

(N)

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.

(L) Material now appears on Page 11.1 of this Section.

(N)

ISSUED: NOVEMBER 30, 2015
EFFECTIVE: DECEMBER 30, 2015
LINDA GUAY, DIRECTOR

SECTION 11 - PRIMEXPRESS NETWORK SERVICE

11.2 PRIMECONNECT OPTION

(L)

Digital PrimeXpress Network Service can be configured to support high volumes of inbound calling. This option will support a maximum of two rate centers per facility or trunk group within the Company-designated service area.

PrimeConnect is intended solely for the purposes of providing local and intraLATA toll calling into or out of the PrimeConnect facility. In the event that local and IntraLATA toll calls placed into or out of the PrimeConnect facility become subject to additional charges imposed by connecting carriers or by regulation, the Company reserves the right to modify the facility rate charges for traffic into or out of the facility upon 30 days written notice to the Customer. The Customer has the option to accept the rate change(s) or terminate the contract without penalty, unless specifically bound to specific commitments associated with capital recovery, special construction, or other issues written into the Customer's contract or agreement with the Company over and above the normal terms and conditions of the contract or agreement.

11.3 FEATURES

The following feature IS available with PrimeXpress Network Service:

Incoming Call Redirect (ICR)

(L)

SECTION 12 - PRIME DIGITAL TRUNK^{1,2}

(T)

12.1 DESCRIPTION

Prime Digital trunk (PDT) is a fractional digital switched service that provides trunk connections from an end user's Private Branch Exchange or capable Key System to the Company Switch Port. Prime Digital Trunk is delivered via a DS1 (1.544 Mbps) facility providing up to 23 voice-grade DS0 communications channels. Prime Digital Trunk is available on a 1, 2, or 3 year term commitment.

The Customer may opt to utilize Prime Digital Trunk service for outgoing calls only (DOD), incoming calls only (DID), or a combination of both inbound and outbound calls. When the Customer elects to utilize Prime Digital Trunk for both inbound and outbound calls, they may choose Two-Way service which allows incoming calls to an attendant only or they can elect to utilize DID/DOD service which allows incoming calls to be terminated directly to an end user behind a PBX or capable Key System. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

Per subscribed Rate Center, the Customer is required to subscribe to a sufficient number of trunks or channels so as not to degrade the Company's network below an incoming call completion rate of 99 percent. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of PDT trunks or channels to satisfy the call completion criteria listed above.

12.2 RATE REGULATIONS

The following rate elements apply to Prime Digital Trunk service:

- A. Per Active Channel (PAC) charge - monthly recurring charge applicable to each active DS0 channel. A minimum of 12 PACs must be ordered per PDT facility.
- B. Non-recurring installation charges are applicable for each DS0 channel.

12.3 FEATURES

The following feature is available with Prime Digital Trunk Service:

Incoming Call Redirect (ICR)

¹ Effective December 30, 2015, this service is no longer available to new customers or for contract renewals.

(N)

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.

SECTION 13 - INTEGRATED PRIME SERVICE^{1,2}

(T)

13.1 DESCRIPTION

Integrated Prime Service provides Local Voice Services on a Customer's spare capacity AT&T channelized Static Integrated Network Access (SINA) or Frame Relay T1 or Frame Relay T1 access channels. The SINA or Frame Relay T1 or Frame Relay T1 access arrangement will include Local Prime Services via Integrated PrimePath Lines and Trunks, Integrated PrimePath NBX³ analog lines and Integrated Prime Digital Trunks.

(T)

Integrated PrimePath NBX services will be terminated based on the schedule set forth below:

- Customers with contracts that expired on or before June 3, 2004, will have two (2) years from this date to migrate to a different service, as their service will be terminated on that date;
- Customers with contracts expiring in 2004 or 2005 will have two (2) years from contract expiration to migrate to a different service, as their service will be terminated on that date;
- Customers with contracts expiring in 2006 will have one (1) year from contract expiration to migrate to a different service, as their service will be terminated on that date;
- Customers with contracts expiring in 2007 or beyond must migrate to a different service on or before contract expiration, as their service will be terminated on contract expiration.

Early termination penalties will be waived for Integrated PrimePath NBX customers wishing to terminate their Integrated PrimePath NBX service and migrate to a different service prior to their contract expiration.

¹ Effective December 30, 2015, this service is no longer available to new customers or for contract renewals. This applies to Integrated Prime Services not already restricted in Footnote 3, following.

(N)

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.

(N)

³ The Integrated PrimePath NBX service component is not available, either under this tariff section or through any Company Contract Tariff or contract referencing this tariff section, to new or existing Customers who did not have it on order on or before June 3, 2004. Existing term plan customers with contracts for Integrated PrimePath NBX in effect or on order prior to June 3, 2004 may continue under their existing terms and condition, and may move, add or change stations at their existing locations, but may not add new locations unless otherwise specified in their contracts. Customers with contracts that expired on or before June 3, 2004, will be placed on month-to-month tariff rates as of June 3, 2004, subject to the termination schedule stated below. Customers with contracts that expire after June 3, 2004, will be placed on month-to-month tariff rates upon the expiration of their existing contract, unless otherwise specified in the contract, subject to (and unless otherwise provided in) the termination schedule.

SECTION 18 - PRIMEPLEX PRI SERVICE

18.1 DESCRIPTION

PrimePlex PRI service is an optional service arrangement for local exchange access based on the Primary Rate Interface (PRI) arrangement of the Integrated Services Digital Network (ISDN). PrimePlex PRI is a high capacity access path for communications providing voice or data transmission over the Company's exchange network. A PrimePlex PRI facility may be provided as stand-alone service or provisioned over an existing or new AT&T ACCU-Ring^{1,2} DS3 or Ultravailable Ring facility.

(T)

18.2 EXPLANATION OF TERMS

Circuit Switching

A switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.

PrimePlex Primary Rate Interface (PRI)

PrimePlex PRI is an alternative for individual local exchange access loop services such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), and business dial tone lines. It can also be used as loop transport for circuit switched data applications. PrimePlex PRI is provisioned on the 1.544 megabits per second (Mbps) bandwidth and uses ISDN architecture of 23 B or bearer channels and 1 D or data channel. It can also be provisioned as 24 B channels when coupled with controlling D facilities on other PRI circuits and backup D facilities. PRI provides the Customer with the capabilities of simultaneous access, transmission, and switching of voice, data, and imaging services via channelized transport. In addition, PrimePlex PRI provides the Customer with the service capabilities and features described herein.

Integrated Services Digital Network

Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture that provides for the simultaneous access, transmission, and switching of voice, data, and imaging services. These functions are provided via channelized transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems that connect Primary Rate Interface lines to their serving central office.

¹ Effective December 30, 2015, this service is no longer available to new customers or for contract renewals.

(N)

² Effective June 1, 2016, existing customers with this service may retain their existing service, but may not conduct moves, adds or changes to the service on or after June 1, 2016. Existing customers with services provided under an unexpired contract will continue to receive the service pursuant to the terms and conditions of their contract until their current contract term expires. Upon expiration of such customer's contract, AT&T will provide the service on a month-to-month basis, subject to the limitations on moves, adds, and changes described above.
